Ekomobong Preciousgift Ifiok-Archibong

Full-Stack Software Engineer | Abuja, Nigeria (Open to Remote)
+234 901 587 1166 | ekomobongarchibong24@gmail.com | GitHub | LinkedIn | Portfolio

Summary

Full-stack engineer with 5 years shipping fintech, payments and AI products end to end, from Rails and Node backends to React frontends on AWS. Founded Platle, an AI study tool featured by leadership at Morgan Stanley; co-founded FanBear, a creator-monetization platform with Stripe and Paystack; led a developer team at Punch Group. Builds with Claude and Claude Code as everyday engineering tools.

Technical Skills

Languages: JavaScript, TypeScript, Ruby, PHP, Python, Dart, SQL, GraphQL, Java, C/C++
Frameworks: React, Next.js, React Native, Flutter, Electron, Node.js/Express.js, Ruby on Rails, Laravel, Ionic React, Tailwind CSS, MUI
Databases: PostgreSQL, MongoDB, MySQL, Redis, BigQuery
Cloud & DevOps: AWS (EC2, S3, SES, SNS), GCP, Azure, Firebase, Docker, Docker Swarm, Traefik, Kubernetes, GitHub Actions, Kafka, Airflow, Nginx, PM2, Git, Jest/Mocha
AI & ML: PyTorch (CNNs, GANs, Transformers, YOLO), Claude, Claude Code, Codex, OpenAI APIs, DialogFlow
Embedded: Arduino (C++), sensors, motor control
Payments: Stripe, Paystack, Paddle, Flutterwave, Monnify, Mono

Work Experience

Next Wave Partners - Full Stack Developer Sept 2025 – Aug 2026
Las Vegas, Nevada (Remote)

- Built scalable fintech platforms for venture capital operations alongside James Thomason (former CTO of Dell Technologies), with a Ruby on Rails backend and React frontend
- Implemented PostgreSQL databases, AWS infrastructure, and Stripe payment systems for investment workflows
- Used Claude and Claude Code as core engineering tools across the Rails and React codebase to ship features faster, refactor, debug, and test

Platle - Founder Dec 2023 – Sept 2025
Abuja, Nigeria

- Built Platle solo, an all-in-one AI tool for students featured by leadership at Morgan Stanley
- Integrated OpenAI APIs so students could research topics and generate study materials, built on React, Express.js, MongoDB, Redis & Socket.io
- Ran frontend, backend and background workers on PM2 behind Nginx on Ubuntu, then migrated the full stack to AWS EC2
- Implemented AWS S3 with Transfer Acceleration for faster uploads and reliable storage
- Integrated Paddle payments and handled customer support directly to resolve user issues

FanBear - Co-founder Dec 2022 – Dec 2023
Ottawa, Canada (Remote)

- Engineered FanBear, a Patreon-like social platform enabling African creators to monetize their content
- Built dual payment rails with Stripe (international) and Paystack (local) to support global transactions
- Developed the platform with React, Express.js, MongoDB, Redis & Socket.io

Punch Group - Full Stack Developer & Team Lead Jan 2022 – Oct 2023
San Antonio, United States (Remote)

- Led the Zwilt recruiting project, coordinating a team of developers and owning end-to-end delivery
- Managed and continuously updated the Pantrei Shopify store, driving it to profitability
- Built custom Shopify apps with Next.js & Node.js, using DialogFlow for AI-powered inventory categorization
- Developed full-stack apps with Express.js, GraphQL, and React.js to process, analyze, and visualize data
- Deployed on AWS EC2 with S3, SES and SNS, and managed VPS servers with PM2/Nginx

CreditChek - Full Stack Developer (Contract) Feb 2022 – Apr 2022
Lagos, Nigeria

- Built a credit, finance and BNPL data platform from Figma designs, letting customers check and verify their creditworthiness
- Delivered a seamless experience across Android, iOS, and Web

- Integrated REST APIs and third-party providers including Monnify, Paystack, Mono and Flutterwave

Walex Biz Nigeria Ltd. - Senior Front-end Developer Sept 2021 – Dec 2021
Abuja, Nigeria

- Built an online healthcare platform for virtual consultations with medical professionals and access to pharmaceutical services
- Developed landing pages & dashboards in React, Vue, HTML/CSS & JavaScript with a focus on user experience
- Owned design tasks end to end, from concept to delivery

Sekani-Tech Company Limited - Backend Developer June 2021 – Sept 2021
Abuja, Nigeria

- Developed and maintained PHP core-banking applications for African microfinance institutions, processing thousands of daily transactions with 99.9% uptime and zero security breaches
- Built secure payment processing for deposits, withdrawals, peer-to-peer and cross-border transfers with real-time settlement
- Implemented KYC/AML compliance features including BVN verification, identity validation, and automated risk assessment

Projects

Deep Learning from Scratch GitHub | *Python, PyTorch* 2025
- Implemented LeNet, VGG, ResNet, EfficientNet and Transformers from scratch, plus DCGAN, WGAN, Pix2Pix, CycleGAN and ESRGAN, U-Net segmentation, and YOLOv1/v3 object detection

Arduino Embedded Systems GitHub | *C++, Arduino* 2025 – 2026
- 40 hardware builds spanning servo, stepper and DC motor control, an ultrasonic distance detector, DHT11 sensor with LCD, IR remote control and shift registers

Docker Swarm Cluster GitHub | *Docker Swarm, Traefik, AWS EC2* 2025
- Built a 3-node Swarm on EC2 behind a Traefik reverse proxy, with continuous deployment, rolling updates and rollbacks for Rails and React services

Severus GitHub | *Python, Go* 2025
- Local-first encrypted vault for developers with TOTP auth, dual-key encrypted sharing via a Go relay server, and offline support (whitepaper)

Nile GitHub | *Ruby on Rails, RSpec, Kamal* 2025
- E-commerce REST API with token authentication, Active Job background processing, RSpec test suite and Docker/Kamal deployment

Desktop System Monitor GitHub | *Electron, React 19, TypeScript* 2025
- Cross-platform desktop app reading live system resources, packaged with electron-builder for macOS (ARM), Windows and Linux

World Time GitHub | *Flutter, Dart* 2025
- Mobile app showing live local time for cities worldwide via WorldTimeAPI, with a location picker and day/night themes

Grammar Fixer GitHub | *JavaScript, OpenAI API* 2025
- Chrome extension that corrects grammar in any text field in one click without losing focus or formatting

Notes CLI GitHub | *Python, Click, Poetry* 2025
- Command-line note-taking tool with full CRUD, packaged with Poetry as an installable command

LoveSet | *React, Express.js, MongoDB, Redis, OpenAI API* 2025
- Swipe-driven movie discovery engine ("Tinder for movies") that learns taste in real time, generating personalized recommendations through OpenAI search APIs with Redis-backed job queues for asynchronous, low-latency processing

Auxcar Admin Suite | *React* 2023
- Three dashboards for a car service platform: Admin, Customer and Driver

NFT Marketplace GitHub | *Solidity, Hardhat, Next.js* 2022
- Smart contracts with Hardhat tests and a Next.js + Tailwind marketplace frontend

Education

Aptech Computer Education May 2020
Certificate of Proficiency in Information Systems Management (CPISM) *Oyo State*

Oritamefa Baptist Model School July 2018
West African Senior School Certificate (WAEC) *Oyo State*
